

LINEAR-24 ELITE

Measuring just 40mm in height, the Linear range represents the very best in slimline auxiliary high beam driving lights. By utilising a combination of highly efficient 3W LEDs and vacuum-metallised wide optics, to deliver a perfectly tuned beam pattern for everyday road use, the 24 Elite boasts 18,000 raw lumens, with 1 lux reaching just under 600m with a 64 degrees spread of light. Dual-output functionality allows for the UNECE reference number to be reduced, in markets requiring a low E-mark reference number, made possible through addition of the Linear E-Mark Cap (sold separately).
